NVTA's TransAction

Transportation Action Plan for Northern Virginia

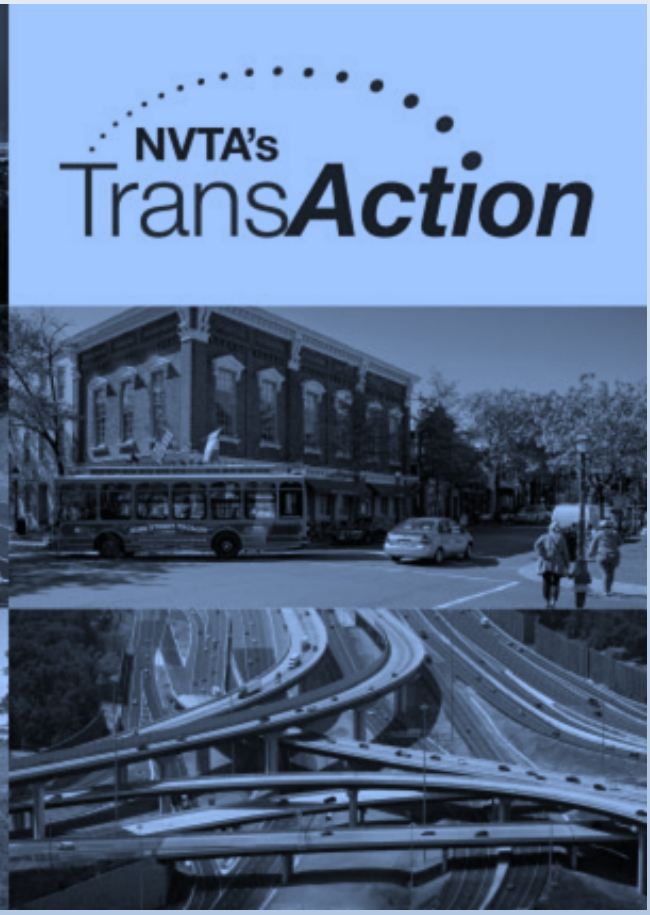

COVID-19: Transportation Impacts and Opportunities

Northern Virginia Transportation Authority Meeting

July 9, 2020

Agenda

- Overall Goals
- Scenario Analysis & Context
- Scenario Definitions
- Scenario Results & Comparison
- Conclusions

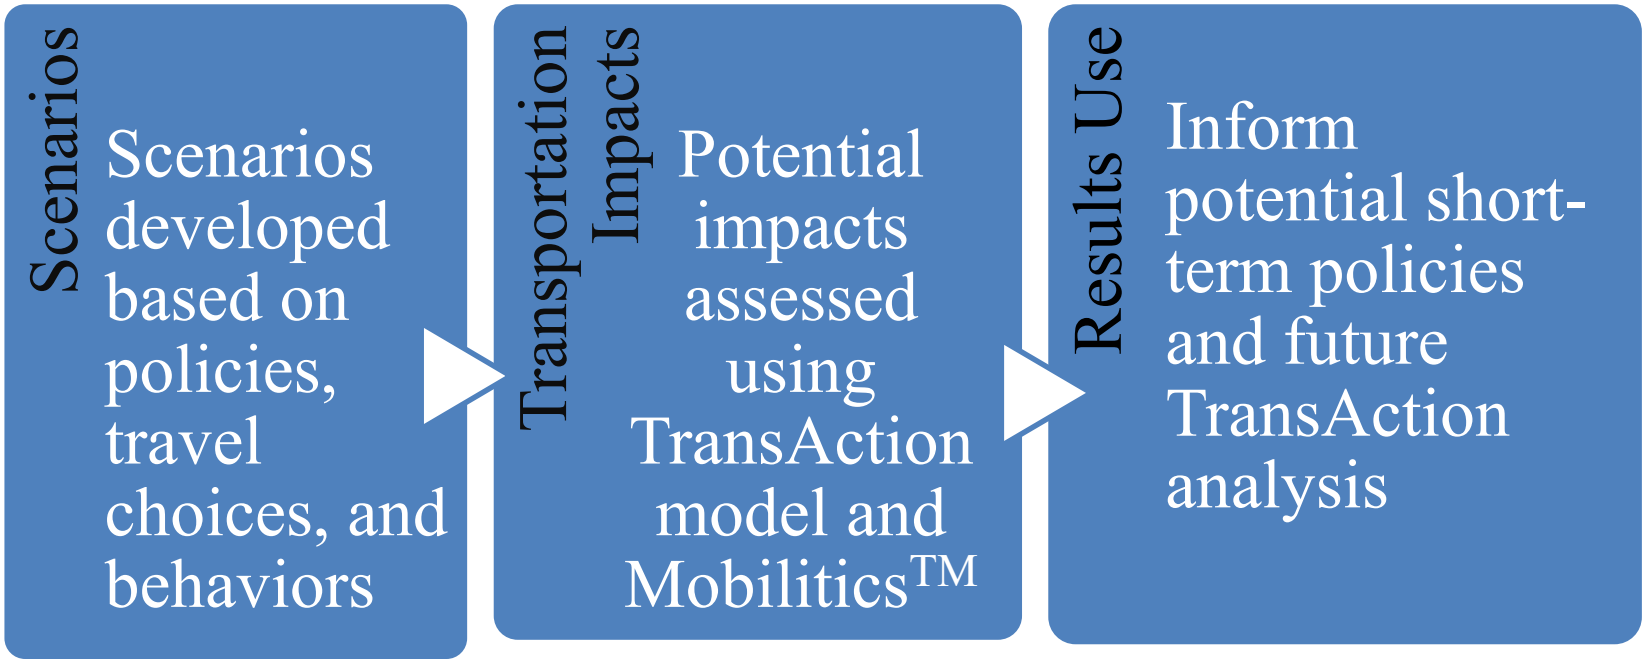

Overall Goals

- Explore impacts to operating conditions & future transportation project investment considerations
  - Model different recovery scenarios to compare impacts
  - Use this analysis to structure future planning efforts

Scenarios & Impacts

Analyze plausible possible future scenarios, not intended to predict the future or imply any preferences

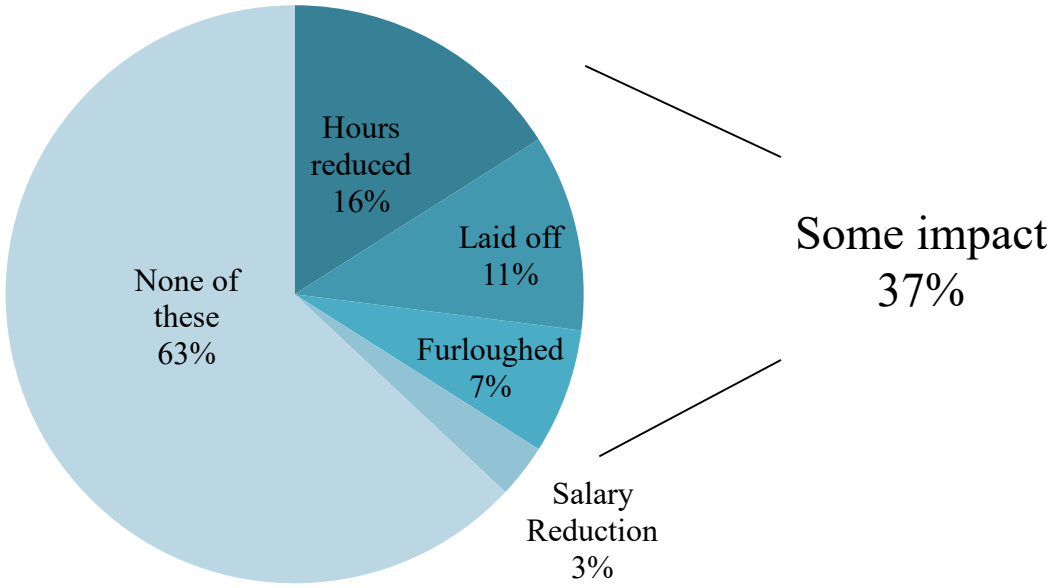

NVTA's TransAction

Background

- Through response to and recovery from COVID-19, trip behavior has been impacted starting in March 2020
- As a result:
  - Telework increased
  - Schools and many businesses closed
  - Travel decreased throughout the region
  - Safety concerns about transit and shared-rides

National Trends: Employment

Gen Z, Millennials, and Gen X are feeling the brunt of the economic impact from job or wage impacts due to COVID-19; decreasing their sense of personal security, happiness, productivity, success and sense of accomplishment.

Reduced hours, laid off, furloughed, or salary reduction by generation (NET)

54% Gen Z
51% Millennials
41% Gen X
19% Boomers
6% Silent

BASE: All Respondents (n=1,001)

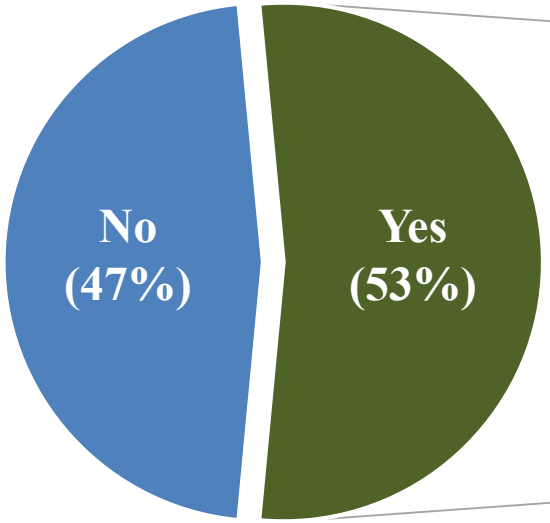

Q1046C. Which of the following has happened to you in the past month?

Source: Heart+Mind June 5th Roundtable

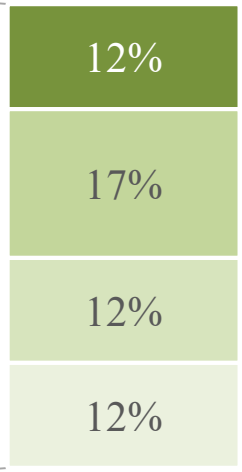

NVTA's TransAction

National Trends: Working from Home

Q: Are you currently working from home?

Q: Thinking of your job before the coronavirus outbreak, how often were you able to work from home?

Never before

Before only less than 25% of the time

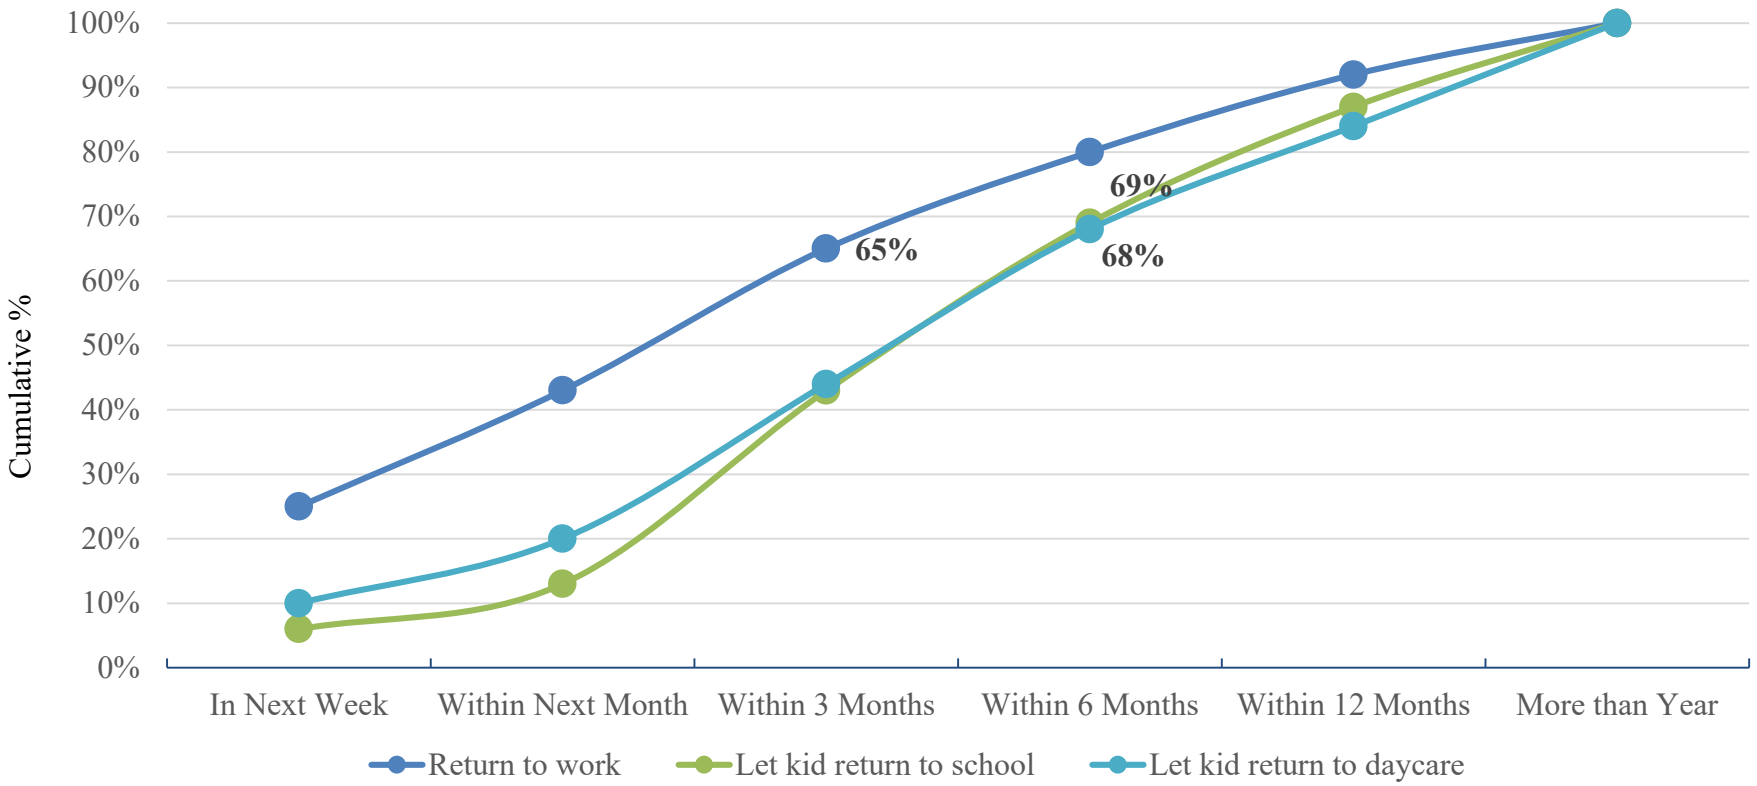

Before between 26-50% of the time

Before more than 50% of the time

Source: Heart+Mind May 27th Roundtable

National Trends: Work Will Return Well in Advance of Childcare

Q: When are you likely to do each of the following?

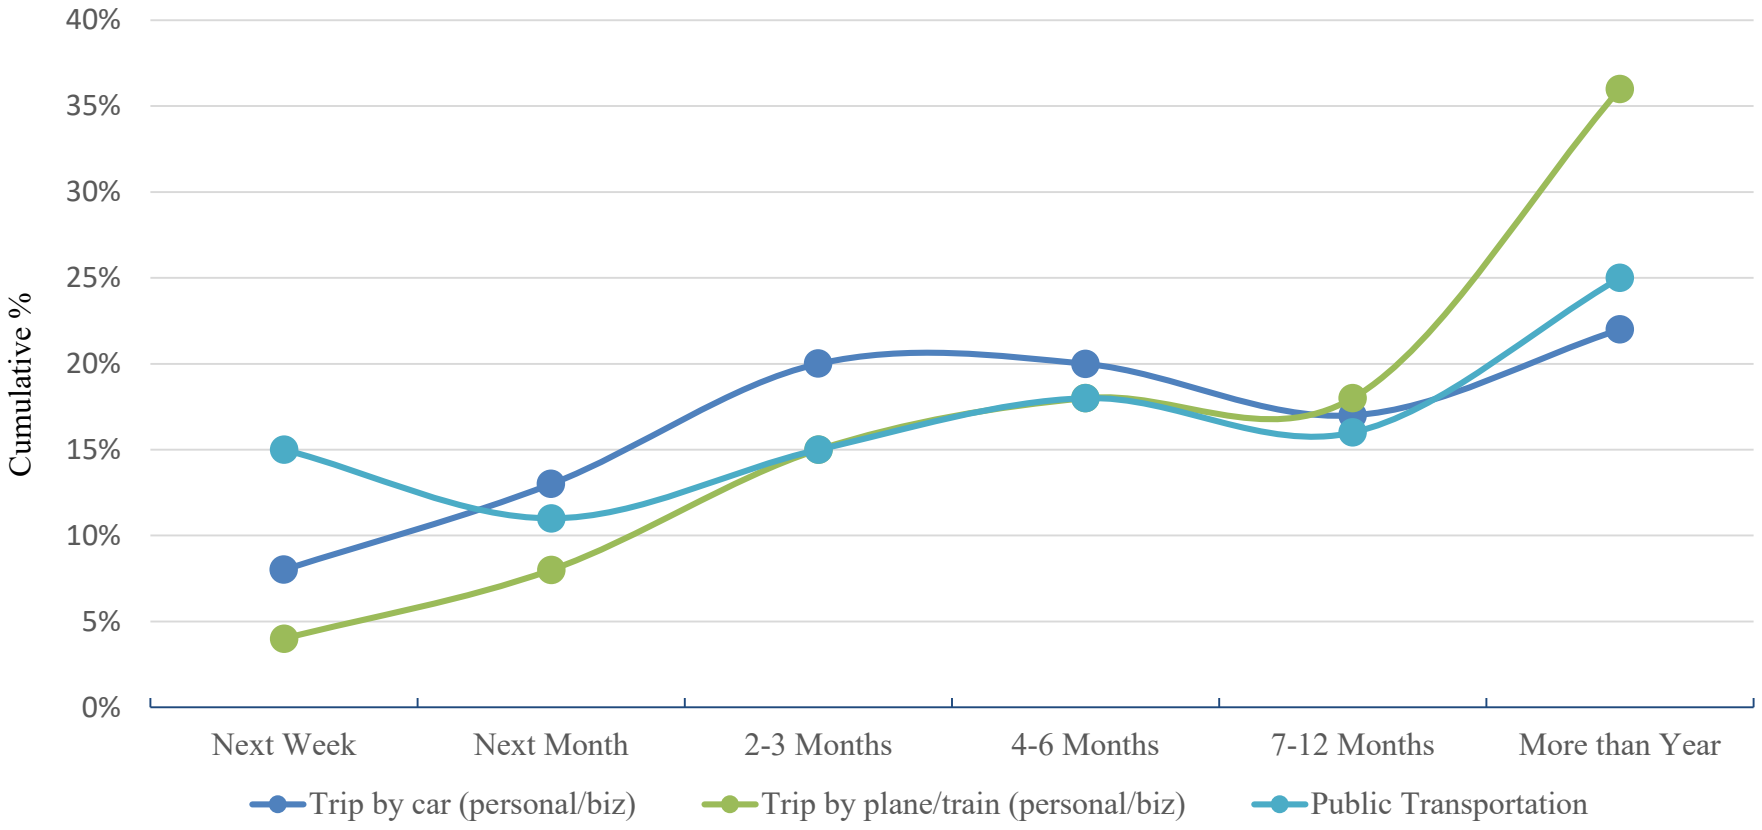

Source: Heart+Mind June 19th Roundtable

NVTA's TransAction

National Trends: Public Transit Lags Behind Car Trips

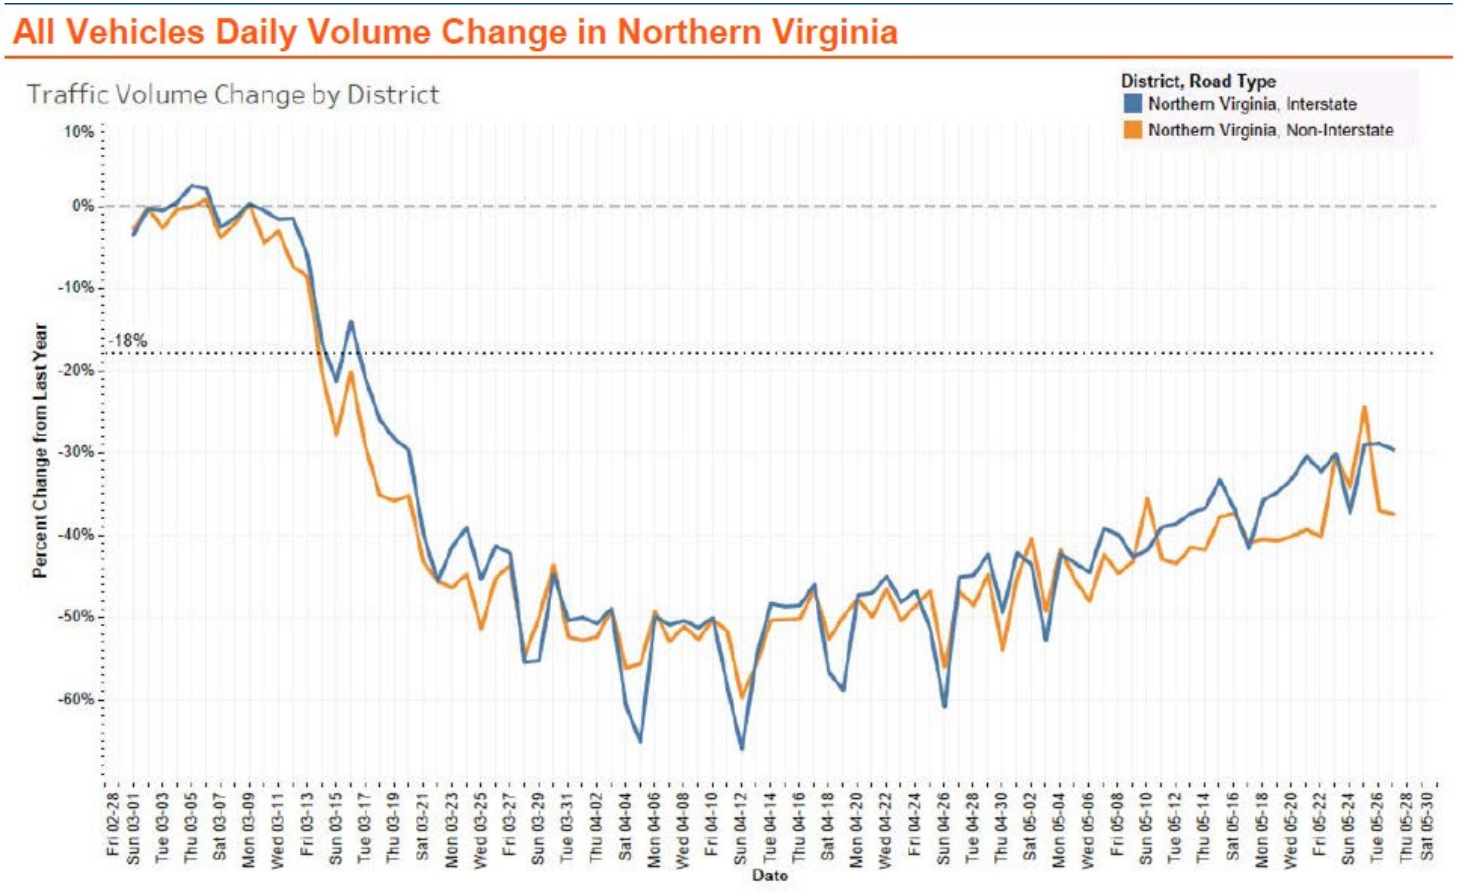

Q: When are you likely to do each of the following?

Source: Heart+Mind June 19th Roundtable

NVTA's TransAction

Regional Trends: VDOT Volume Trends

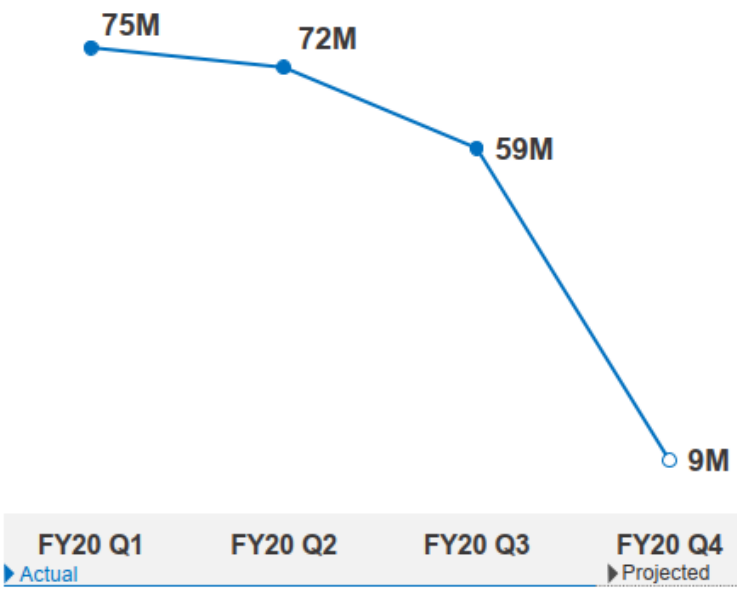

Mid-April shows the lowest daily volume at -55% compared to 2019 levels

Source: VDOT data presented at the Commonwealth Transportation Board June 17th Meeting

NVTA's TransAction

Regional Trends: WMATA Ridership

Ridership Decline of 88% from Q4 FY2020 Budget

- Metrorail 94% ↓
- Metrobus 78% ↓
- MetroAccess 69% ↓

8 WASHINGTON METROPOLITAN AREA TRANSIT AUTHORITY

NVTA's TransAction

Northern Virginia Reopening Phases

- Phase 1 (started 5/29)
  - Continued social distancing & teleworking
  - Non-essential businesses, like restaurants and salons, reopened with limited capacity
- Phase 2 (started 6/12)
  - Social gatherings increase from 10 to 50 people
  - Restaurant and beverage establishments may offer indoor dining at 50% occupancy & certain recreation/entertainment venues without shared equipment may open with restrictions

Northern Virginia Reopening Phases

- Phase 3 (started 7/1)
  - Limit the occupancy of physical spaces to ensure adequate physical distancing may be maintained
  - Encourage telework, when not feasible move/stagger workstations to maintain 6 feet of distance
- Phase 4 “New Normal” – June 2021-2025

Scenario Definitions

Scenario	Short Term (2020-2021)	"New Normal" (2025)
Quick Recovery	Economy recovers by fall and most people are back to work and school	Overall travel is about 95% of pre-COVID levels
Active Transportation	Gradual recovery where more people drive alone or take active transportation (walking/biking)	Active transportation remains higher than 2019; overall travel about 90% of pre-COVID levels
Second Pandemic Wave in October	A second stay at home advisory issued in October, with an increase in job loss and teleworking and a decrease in transit ridership	Most significant impact on overall travel, returning only to about 85% of pre-COVID levels
Cautious Recovery	Most gradual recovery with low school attendance and business related travel is reduced, & E-commerce increases	Overall travel lower than Quick Recovery Scenario at about 90% of pre-COVID levels

Scenario Comparison: Assumptions

	Quick Recovery		Active Transportation		Second Wave		Cautious Recovery	
	Short Term	New Normal	Short Term	New Normal	Short Term	New Normal	Short Term	New Normal
Telework*	10%	10%	20%	15%	50%	10%	25%	15%
Jobs Lost*	3%	0.5%	5%	1%	10%	6%	8%	2%
School Attendance	90%	95%	90%	95%	0%	100%	40%	90%
Transit Safety Perception	85%	100%	75%	95%	25%	95%	40%	100%
Active Transportation	Pre-COVID Mode Share		60% trips <5 mi are walk/bike. Mode share increases 30%.		Pre-COVID Mode Share		Pre-COVID Mode Share	

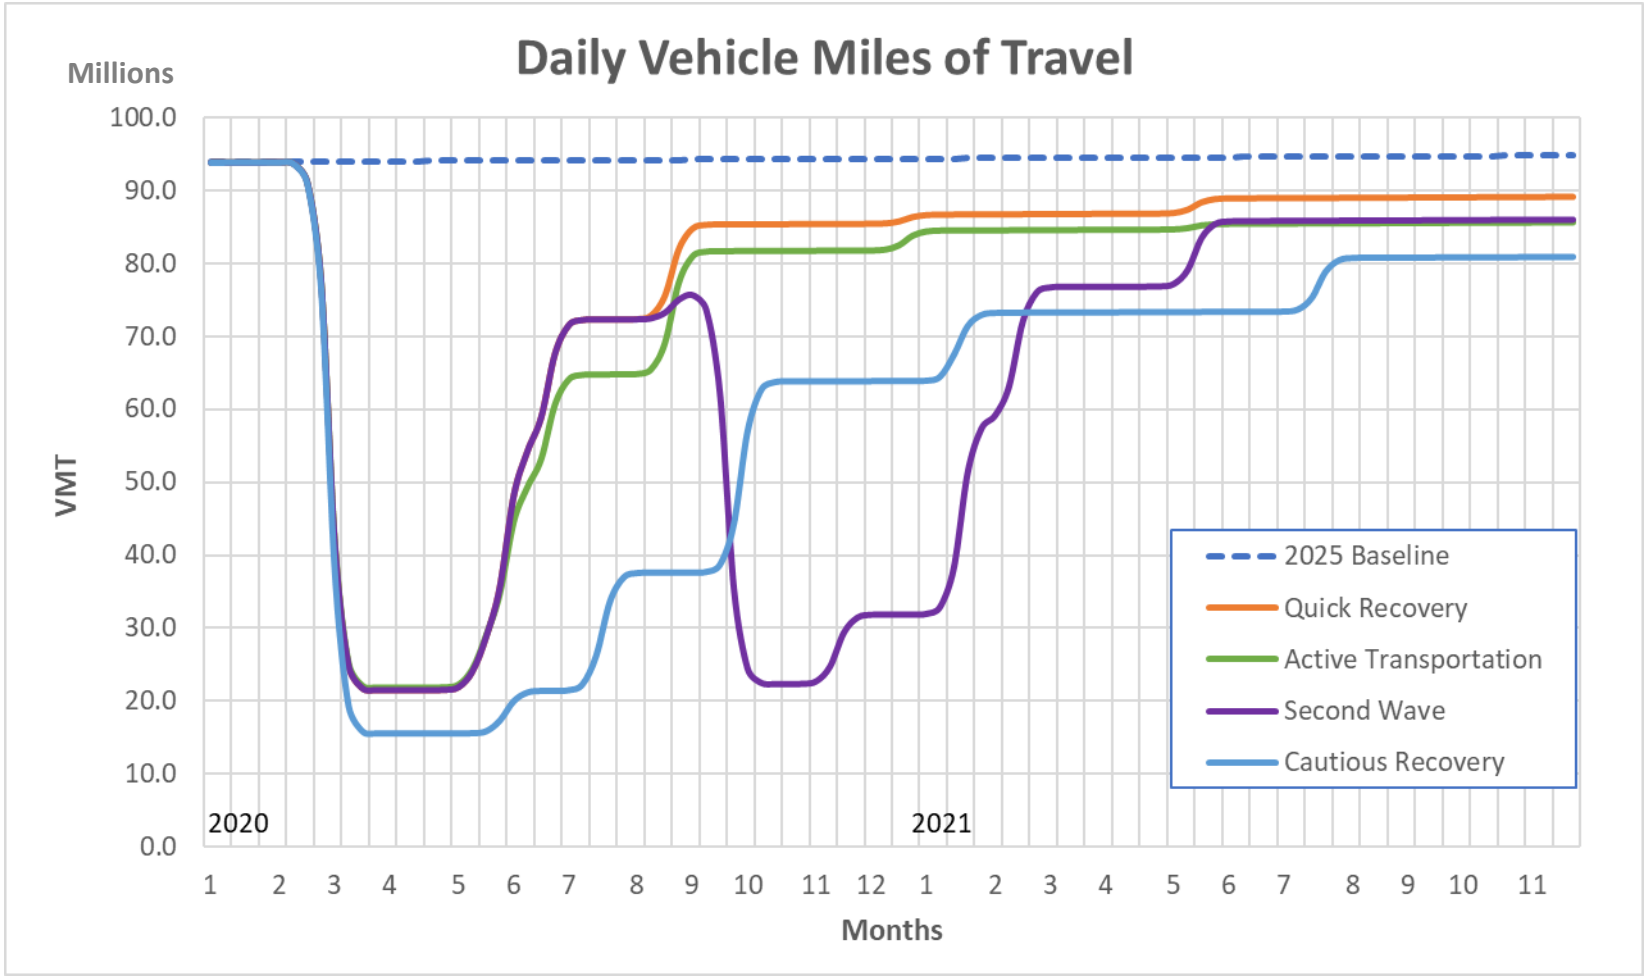

**Compared to pre-COVID levels*

NVTA's TransAction

Short Term Impacts

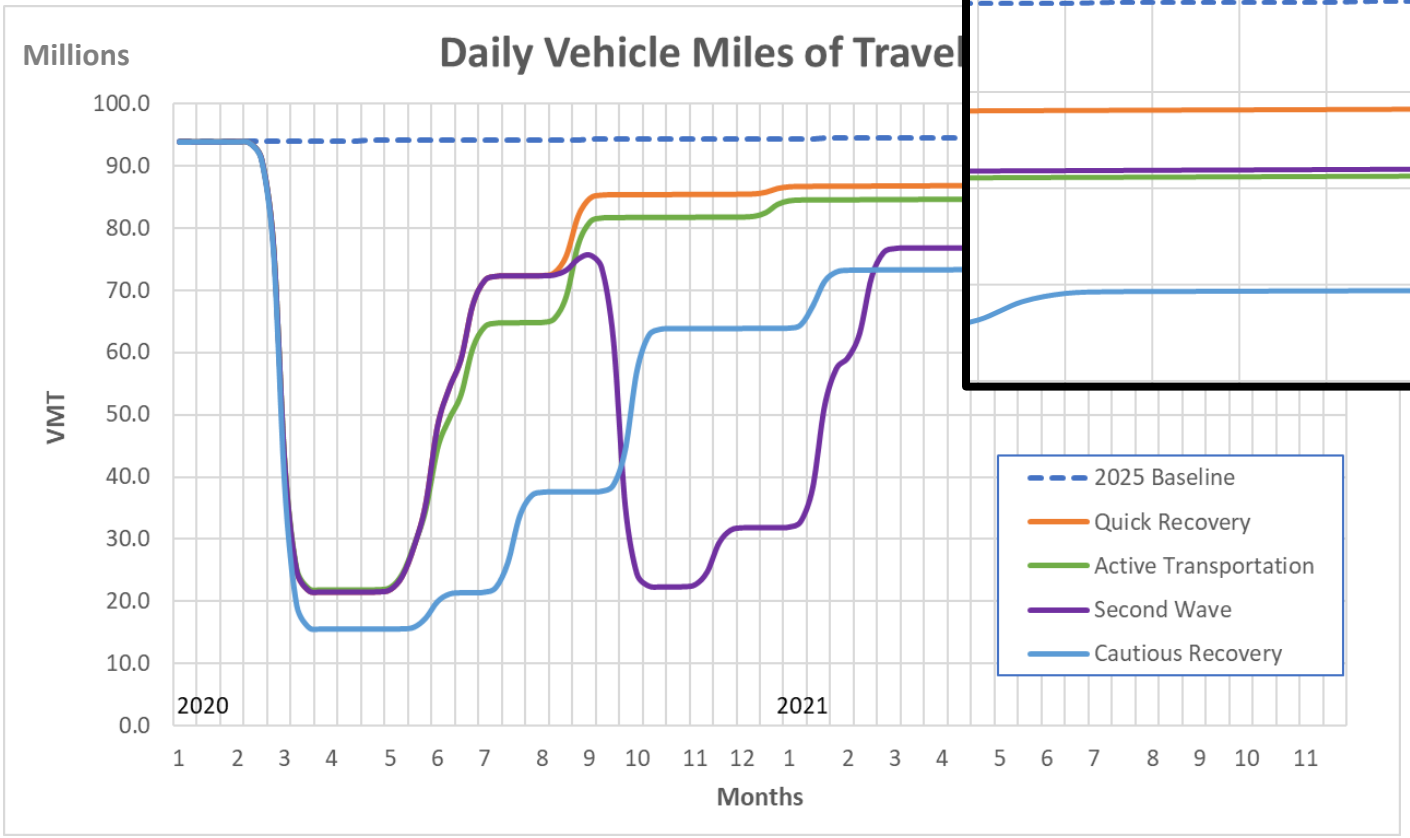

Jan 2020 to June 2021

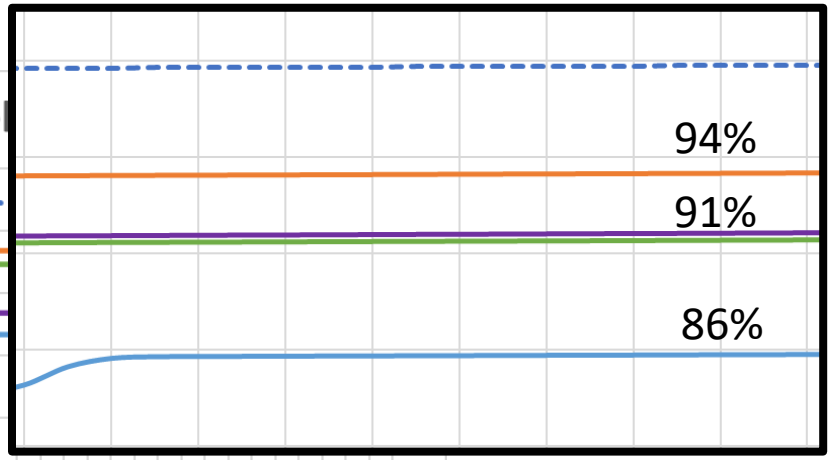

Impact on Vehicle Miles Traveled (VMT)

“New Normal” Impacts

Horizon Year: 2025

2025 Transportation Network Performance

- Evaluate the scenarios using TransAction performance metrics
- Multi-modal measures that address accessibility and mobility in the region
  - Congestion
  - Transit ridership
  - VMT, etc.

Findings: Selected Measures (2025)

Measures (Weekday)	Base 2025 Conditions	Quick Recovery (%Change)	Active Transportation (%Change)	Second Wave (%Change)	Cautious Recovery (%Change)
Auto Trips	6,883,071	-16%	-46%	-24%	-38%
Transit Trips	618,202	-15%	-36%	-22%	-37%
Transit Share%	8.2%	+0.1%	+1.4%	+0.2%	+0.1%
Transit Boardings	889,648	-15%	-33%	-22%	-37%
Miles of Travel (Person)	116,060,798	-16%	-30%	-24%	-38%
Hours of Travel (Person)	4,040,851	-31%	-49%	-42%	-55%
Hours of Delay (Person)	1,472,169	-57%	-81%	-72%	-85%
Transit Crowding	1,564	-34%	-58%	-58%	-66%

Findings: VMT by Jurisdiction (2025)

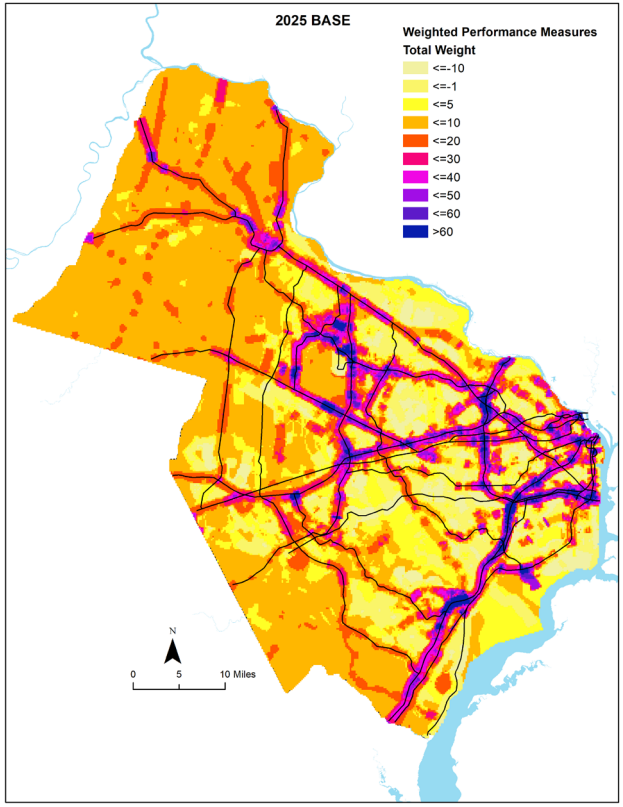

Miles of Travel Per Person (Auto & Transit)	Base Conditions (2025)	Quick Recovery (%Change)	Active Transportation (%Change)	Second Wave (%Change)	Cautious Recovery (%Change)
Arlington	8.3 mil	-19%	-35%	-28%	-45%
Alexandria	5.2 mil	-18%	-36%	-28%	-44%
Fairfax, Fairfax City & Falls Church	62.0 mil	-16%	-29%	-24%	-38%
Loudoun	18.1 mil	-14%	-28%	-21%	-34%
Prince William, Manassas & Manassas Park	22.5 mil	-16%	-31%	-24%	-38%

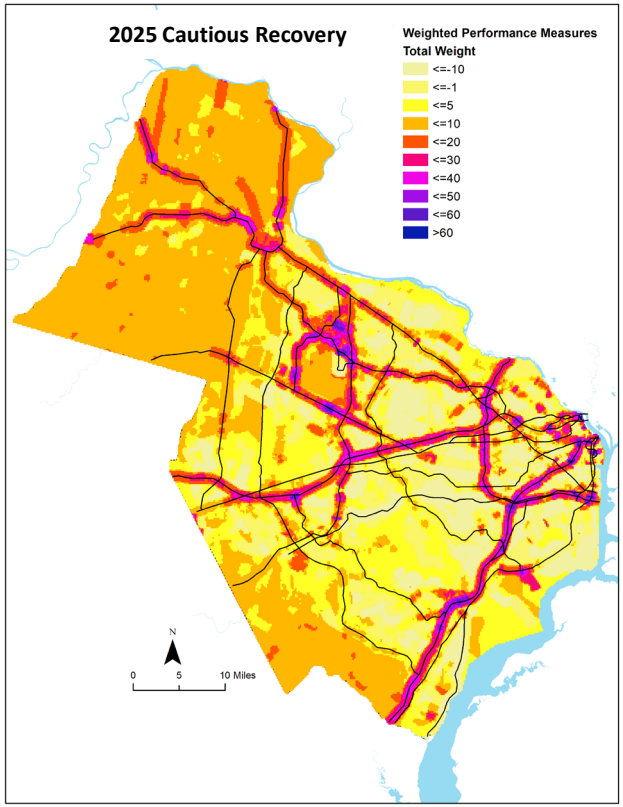

Findings: Person Hours of Delay by Jurisdiction (2025)

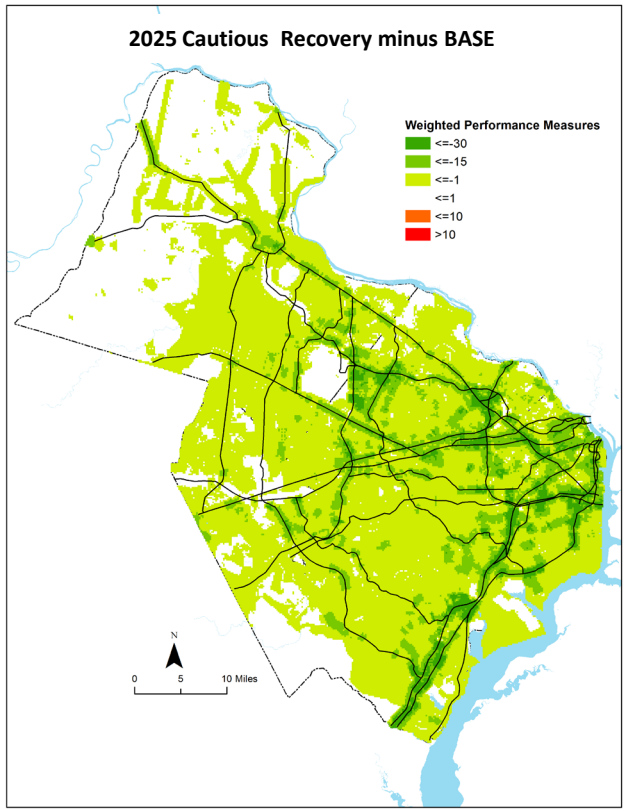

Person Hours of Delay (PHD)	Base Conditions (2025)	Quick Recovery (%Change)	Active Transportation (%Change)	Second Wave (%Change)	Cautious Recovery (%Change)
Arlington	143,000	-66%	-87%	-80%	-92%
Alexandria	84,500	-69%	-90%	-83%	-94%
Fairfax, Fairfax City & Falls Church	792,000	-61%	-83%	-75%	-88%
Loudoun	264,400	-44%	-68%	-57%	-72%
Prince William, Manassas & Manassas Park	188,300	-48%	-77%	-68%	-84%

Overall Impact of Cautious Recovery Scenario

Weighted Performance Measures

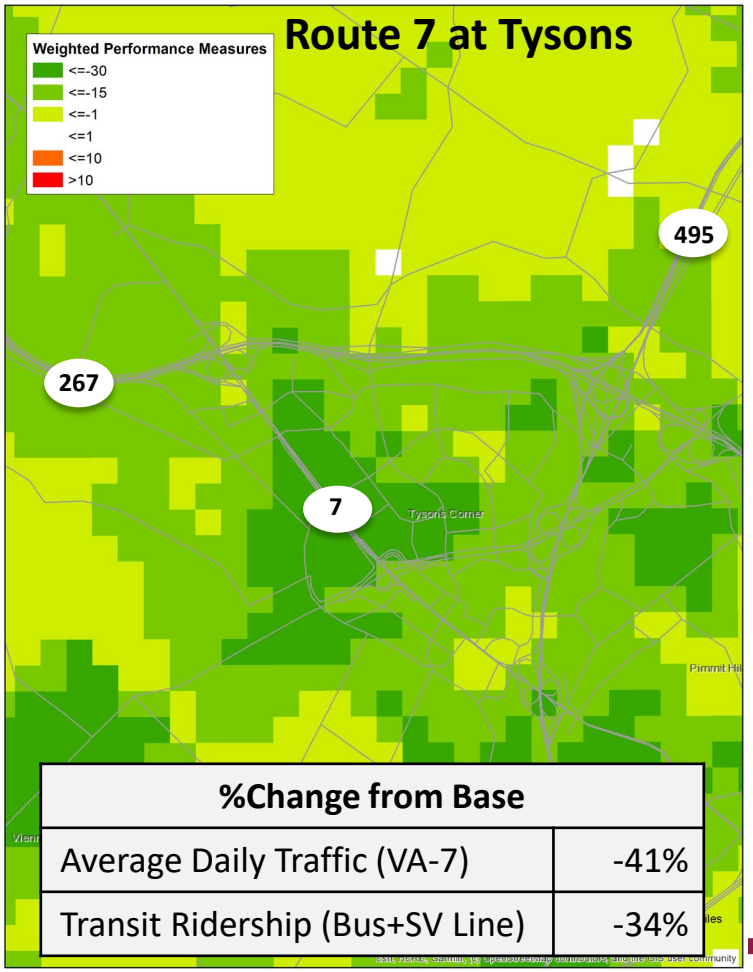

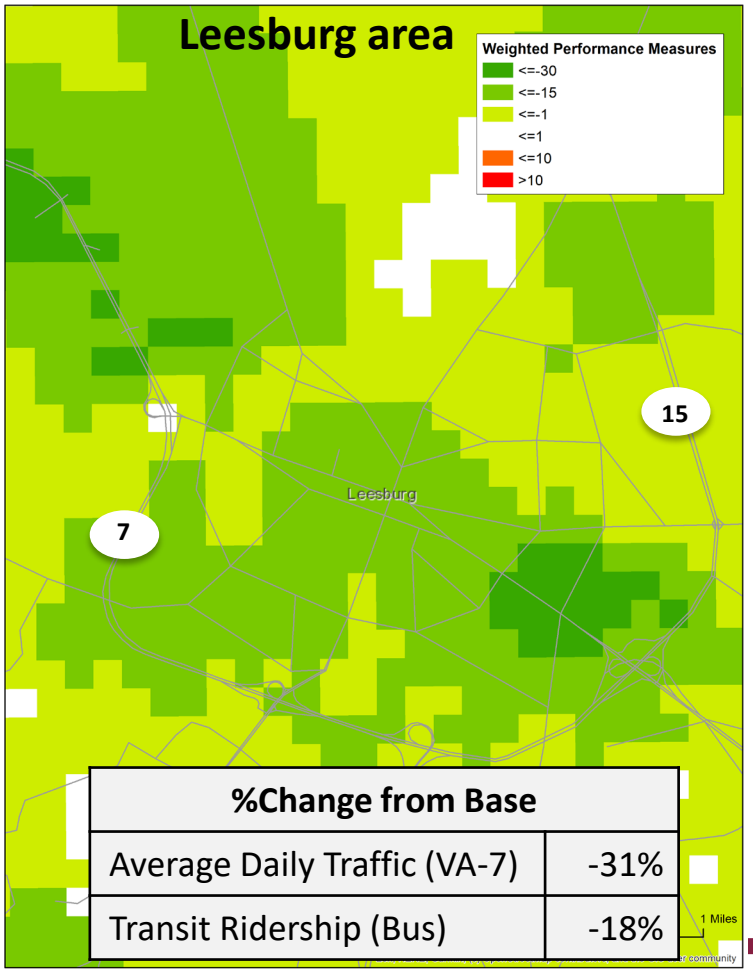

NVTA's TransAction

Cautious Recovery Scenario: Route 7 Tysons; Leesburg

Weighted Performance Measures

%Change from Base	
Average Daily Traffic (VA-7)	-41%
Transit Ridership (Bus+SV Line)	-34%

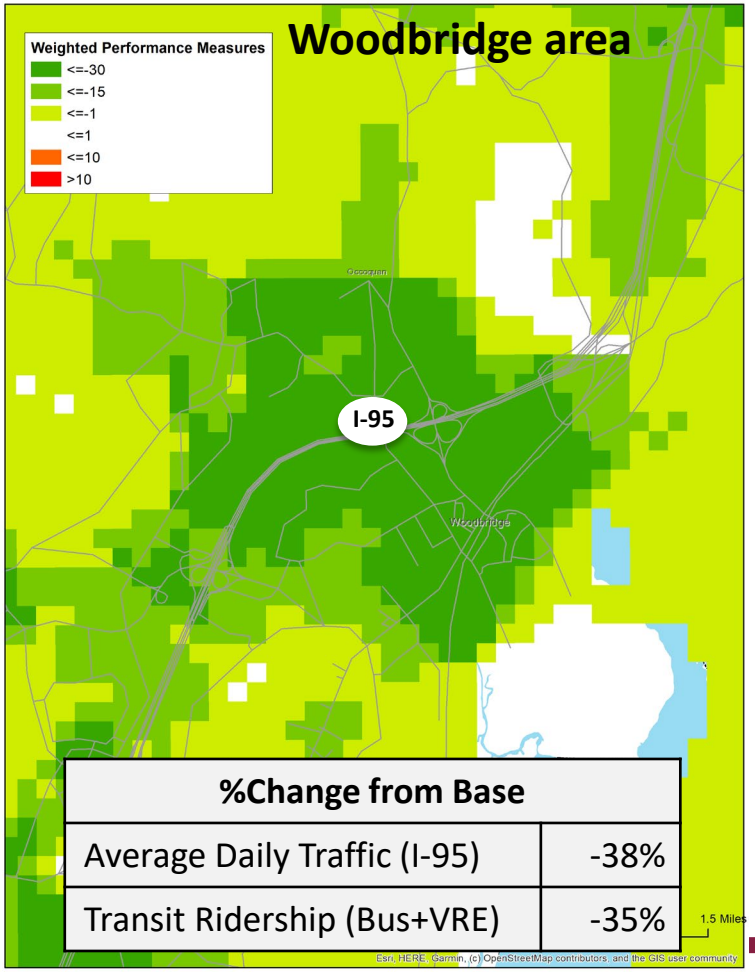

%Change from Base	
Average Daily Traffic (VA-7)	-31%
Transit Ridership (Bus)	-18%

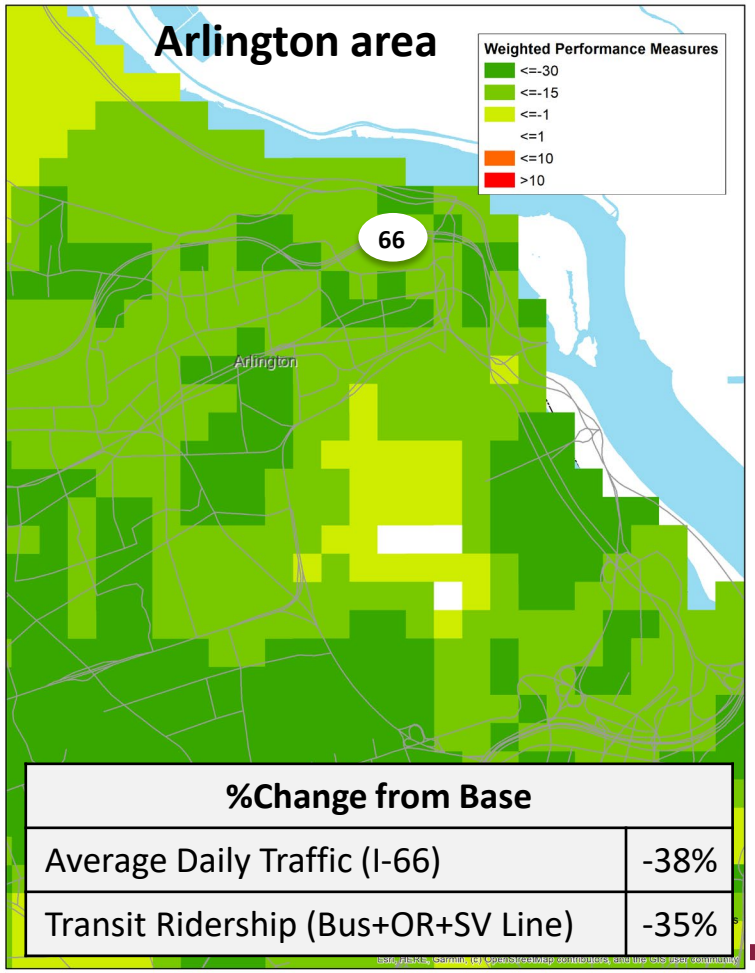

NVTA's TransAction

Cautious Recovery Scenario: I-95 South near Woodbridge; Arlington

Weighted Performance Measures

%Change from Base	
Average Daily Traffic (I-95)	-38%
Transit Ridership (Bus+VRE)	-35%

%Change from Base	
Average Daily Traffic (I-66)	-38%
Transit Ridership (Bus+OR+SV Line)	-35%

NVTA's TransAction

“New Normal” Scenario Observations

- All four scenarios assume 10-15 percent more telework than pre-COVID levels, and school attendance levels close to pre-COVID levels
- All four scenarios reduce auto and transit trips
  - ‘Active Transportation’ scenario has the largest impact for auto trips (46 percent reduction)
  - ‘Cautious Recovery’ scenarios has the largest impact for transit trips (37 percent reduction)
- All four scenarios reduce person hours of delay
  - ‘Cautious Recovery’ scenario has the largest impact (85 percent reduction)
  - Impact is most pronounced among inner jurisdictions, but is still significant for outer jurisdictions
  - Impact is evident along major corridors

Conclusions

- Short Term
  - The majority of changes occur within the first 18 months and level off around June 2021
- "New Normal"
  - Teleworking and economic impacts result in:
    - Traffic volumes and transit ridership that do not fully recover to pre-COVID levels
    - Significant reductions in time spent traveling and time lost in congestion
    - While congestion reduction impacts are a positive, transit ridership reduction may be challenging to financial stability of some transit agencies

Implications for NVTA's Planning and Programming Responsibilities, and Transportation Policy

- These findings suggest several topics for further consideration through the upcoming TransAction planning process and ongoing capital program development
  - Potential **policies** to support continued teleworking at greater than pre-COVID levels while mitigating impact on transit ridership, e.g. incentivization
  - **Using data** to further refine understanding of travel choices by households and businesses, and implications on the network
  - Quantifying the extent to which **TDM programs** influence travel behavior
  - Projects that support **multiple modes of transportation**
  - Emphasis on **flexible use of right-of-way** to accommodate changing travel patterns

Q & A

Backup Slides

Performance Measures

1.1.1	Total Person Hours of Delay
1.1.2	Transit Crowding
1.1.3	Person Hours of Congested Travel in Automobiles
1.1.4	Person Hours of Congested Travel in Transit Vehicles
1.2.1	Congestion Severity: Maximum Travel Time Ratio
1.2.2	Congestion Duration
1.3.1	Percent of jobs/population within ½ mile of high frequency and/or high performance transit
1.3.2	Access to jobs within 45 mins by auto or within 60 mins by transit
1.4.1	Average travel time per motorized trip between Regional Activity Centers
1.4.2	Walkable/bikeable environment within a Regional Activity Center
2.1.1	Safety of the transportation system
2.2.1	First and last mile connections
2.3.1	Travel by non-SOV modes
2.4.1	Person hours of travel caused by 10% increase in PM peak hour demand
3.1.1	Vehicles miles traveled (VMT) by speed
