If of the extension would be constructed in the median of the Dulles Airport Access Road and Dulles Conre Road, but the alignment would also directly serve Tysons Corner and Dulles Airport. The extension would include 11 new Metrorail stations, a rail yard site on Dulles Airport property, and an expansion of the exit rail yard at West Falls Church. Four of the new stations would be located within Tysons Corner. | Aost<br>ector<br>Ild    |   |           |

| Interstate           | I-95 (Capital Beltway)                | Telegraph Road                                | MD 210                                       | This alternative consists of two side-by-side 70 foot clearance drawbridges on the current alignment, along with associated interchange improvements. The facility would provide for general-pupose lanes to match the Beltway, plus two merge/auxiliary lanes, and an express/local configuration with shoulders. The new facility would be designed to enable reconfiguration within the initially constructed footprint to accommodate an additional two lanes exclusively for HOV/express bus/rail transit, in the event such service is established on connecting systems in Maryland and Virginia. | \$2,564,110                           | 2007 8                                      |           |
|                      |                                       |   | Phases II-VIII & Congestion                  | The existing interchange will be reconstructed to separate I-95 through traffic from traffic oriented to the Springfield area. This will alleviate the severe safety and congestion problems that are currently experienced due to the complex weaving maneuvers in the area between the Beltway and VA 644 (Old   |                                       |   |           |
