Prince William County

NVTA's TransAction

Methodology: Reporting Notes

- Survey Respondent Selection
  - Scientific study using an opt-in online panel.
  - Respondents must be age 18+ and residents of Northern Virginia, more specifically, residents of Arlington County, Fairfax County, Loudoun County, Prince William County, Alexandria, Fairfax City, City of Falls Church, Manassas, and Manassas Park.
  - We aim for an overall representation of regional demographics based on age, gender, and race according to the US Census. We also aim for a proportionate sample that represents each county/city by population size according to the US Census. For the most part we use sample quotas to hit these demographic targets.
- Confidence Interval and Margin of Error
  - All sample surveys and polls, whether or not they use probability sampling, are subject to multiple sources of error which are most often not possible to quantify or estimate. Online opt-in panels such as the one used for this study do not use probability sampling and accordingly the strict calculation of sampling error is not typically done. In the hypothetical case of a perfectly random sample and no response or measurement errors, a sample of this size (n=616) would produce a margin of error of $\pm$ 3.95% at a 95% confidence interval. Margins of error for subgroups would be higher.
- Ethnicity clarification
  - Black, White, Asian refer to Non-Hispanic Black/White/Asians.
- Statistical Testing Notations
  - Indicates statistically significant differences between 2016 and 2019 (p<.05). When appropriate, the report indicates these differences using green, red, and blue color coding wherein green = an increase or positive change; red = decrease or negative change; blue = may be construed as either positive or negative/or just a change that might be of interest.
- ( ) Numbers in parenthesis are of interest but are not statistically significant at p<.05 level. When shown these numbers are color coded in the same way as described in prior bullet.

NVTA's TransAction

EXECUTIVE SUMMARY

Executive Summary: Key Highlights

- Overall, since the launch of the benchmark wave*, residents see improving performance from both the region and NVTA.

  - 39% of residents say that the Northern Virginia region's performance is either excellent or good on transportation related issues.
    - A gain of +12 points over time (30% 2016; 27% 2015).

  - 47% of residents say that NVTA's performance is either excellent or good.
    - A gain of +12 points as well from the benchmark wave (34% 2016; 35% 2015).

*Benchmark wave refers to the first wave of the tracker conducted in 2015.

- Northern Virginia residents' interest in transportation issues is still high (Top 3 Box Interest: 74%; Top 3 Box Informed: 61%).

- Impact of transportation on Quality of Life also stays slightly positive overall with an average score of 6 (6/10).

- Concern about traffic congestion on Quality of Life decreases by 7 points to 26% (vs. 33% in 2016) and the focus turns to areas like housing.
  - Traffic congestion is also less influential when choosing where to live (17%) versus where to work (42%).

- Residents also report their normal commute time is 3 minutes faster.
  - However, the average maximum acceptable commuting time stays unchanged.
  - And, there is a slight decline in the number of residents who drive to work.

- A majority now say that the region is doing a mostly "good job" on key transportation priorities impacting Quality of Life (56% 2019; 51% 2016; 43% 2015: A +13-point increase from the benchmark wave).

- The gap between recall of positive and negative news shrinks this wave.
  - Residents are more likely to recall positive news and are much less likely to recall negative news compared to prior waves
  - Social media continues to grow as an information source for regional transportation news at the expense of traditional media (print, radio and TV)
  - Overall, residents' recall of transportation related news stories declines versus prior waves (56% 2019; 68% 2016; 65% 2015).

Executive Summary: Awareness and Performance of Regional Transportation Initiatives and Authorities

Awareness of:

- NVTA remains stable over time (35% 2019; 34% 2016; 33% 2015).

- TransAction also remains relatively stable as it holds on to the gains it made in 2016 (17% 2019; 15% 2016; 8% 2015).

    - TransAction was adopted in 2017 and has been largely dormant/missing from news since, so it is encouraging to see it hold /increase gains.

- A majority (58%) are unaware of any regional bus system initiatives.

    - Among those aware, many only recall one initiative.

- NOVA Rides, a NVTC Initiative, is at 30%.[*]

    - Note: NOVA Rides was heavily promoted through advertising and NVTA/TransAction spends very little on advertising. Thus, the NOVA Rides Initiative experience appears to demonstrate the power of targeted advertising in a relatively short period of time.

Performance on planning and implementing transportation solutions:

- Both the region and NVTA see significant improvements in their performance ratings (see also slide 6).

- Additionally, performance ratings for all regional priorities also improve in 2019 (see next slide).

*New item not asked in prior waves

NVTA's TransAction

- Performance is improving across all regional transportation priorities, while importance stays either on par or decreases slightly compared to prior waves. Declining Importance plus Improving Performance means the issue(s) are being handled effectively.
  - While there is still much work to be done, residents note significant <u>performance improvements</u> on affordable transportation, using technology to improve efficiencies and safety, investing in new highways and road improvements, and providing new public transportation options.
  - The <u>declining importance</u> of reducing trip times and more predictable trip times may be due to some combination of: The rise in remote work, increased use of ridesharing options, the rise in online shopping, and completion of public transit and roadwork related projects.
  - Not only do residents consider reducing trip times and more predictable trip times of less importance, they also find them less impactful as communication strategies.
- Among potential projects, new/extended metro rail lines top the list.
- When asked about future funding strategies, incentives top the list.
  - Changing motor vehicle taxes and variable pricing for HOT lanes are a distant second.

NVTA's
Trans**Action**

Executive Summary: Messaging

- In terms of communication, focusing on *reducing travel time(s)* is still the best way to motivate interest and support among residents.

  - However, this message is less impactful today than it was in the benchmark wave (61% in 2019; 69% in 2016; 78% in 2015. A decrease of 17 points).

- When prioritizing investment, residents distribute most funds to roads and rail/transit.

- Residents describe self-driving cars as "scary" or "dangerous," with a smaller group also categorizing them as "good."

- While the use of ridesharing services increases to 60% from 45% in 2016, future use appears to be flattening.

- Use of vehicle sharing services (Zipcar/car2go) and Capital Bikeshare also increase from the last wave.

- Almost half (46%) of Northern Virginia residents shop online at least once a week, and a fifth (19%) shop online at least multiple times a week.

KEY FINDINGS

Transportation

SETTING THE STAGE

Interest in transportation issues remains high.

Q300. Think for a moment about the impact of transportation on your overall quality of life here in Northern Virginia. Imagine a ladder with ten steps representing the "ladder of life." Let's suppose the top of the ladder, the tenth step, represents the best possible life for you from a transportation perspective; and the bottom, the first step, the worst possible life for you from a transportation perspective. On a scale of 1 to 10, on which step of the ladder do you personally stand at the present time?

NVTA's TransAction

Transportation
PERSONAL VALUES

As concerns about traffic congestion decrease, focus turns to areas like housing.

Significant Impact on Quality of Life

Factor	2016	2019
Reducing traffic congestion and improving transportation options	33%	26% (-7% ▽)
Improving affordability of housing and living—making it easier to afford to live here	18%	24% (+6% △)
Increasing the number and quality of jobs	12%	10%
Increasing access to high quality affordable healthcare	6%	8%
Reducing crime and making neighborhoods safer	8%	7%
Improving range of housing choices (single family, townhome, apartments, etc.)	4%	7% (+3% △)
Reducing poverty and income inequality	6%	7%
Improving access and enjoyment of outdoor recreational opportunities for everyone	4%	4%
Improving quality of education in kindergarten to 12th grade	6%	4%
Increasing access to higher education and vocation training for local residents	4%	3%

When looking across groups, reducing traffic congestion is more important to (2019):
- Ages 55+
- Men
- Fairfax County residents
- White residents
- Those who have lived in region for 15+ years
- On average, have slightly higher commuting times
- Want higher spend on roads
- HHI $100k+
- Home-owners
- Influencers

Improving housing affordability is more imp. to (2019):
- Those who have lived in the region for < 10 years
- Ages 18-35
- Women
- Hispanic and Black residents
- Single
- Residents who are more likely to be high school graduates and/or have some college education
- Employed part-time
- HHI < $50k
- Want higher spend on incentivizing less driving at peak times
- Much more likely to be using ridesharing services and scooters

BASE: ALL RESPONDENTS (2016 n=606, 2019 n=616)
Q156. People in different regions of the country mention many factors that contribute to their quality of life. Thinking about the quality of life specifically in the Northern Virginia region, please identify which one of the following factors has the most significant impact on the overall quality of life for you personally.
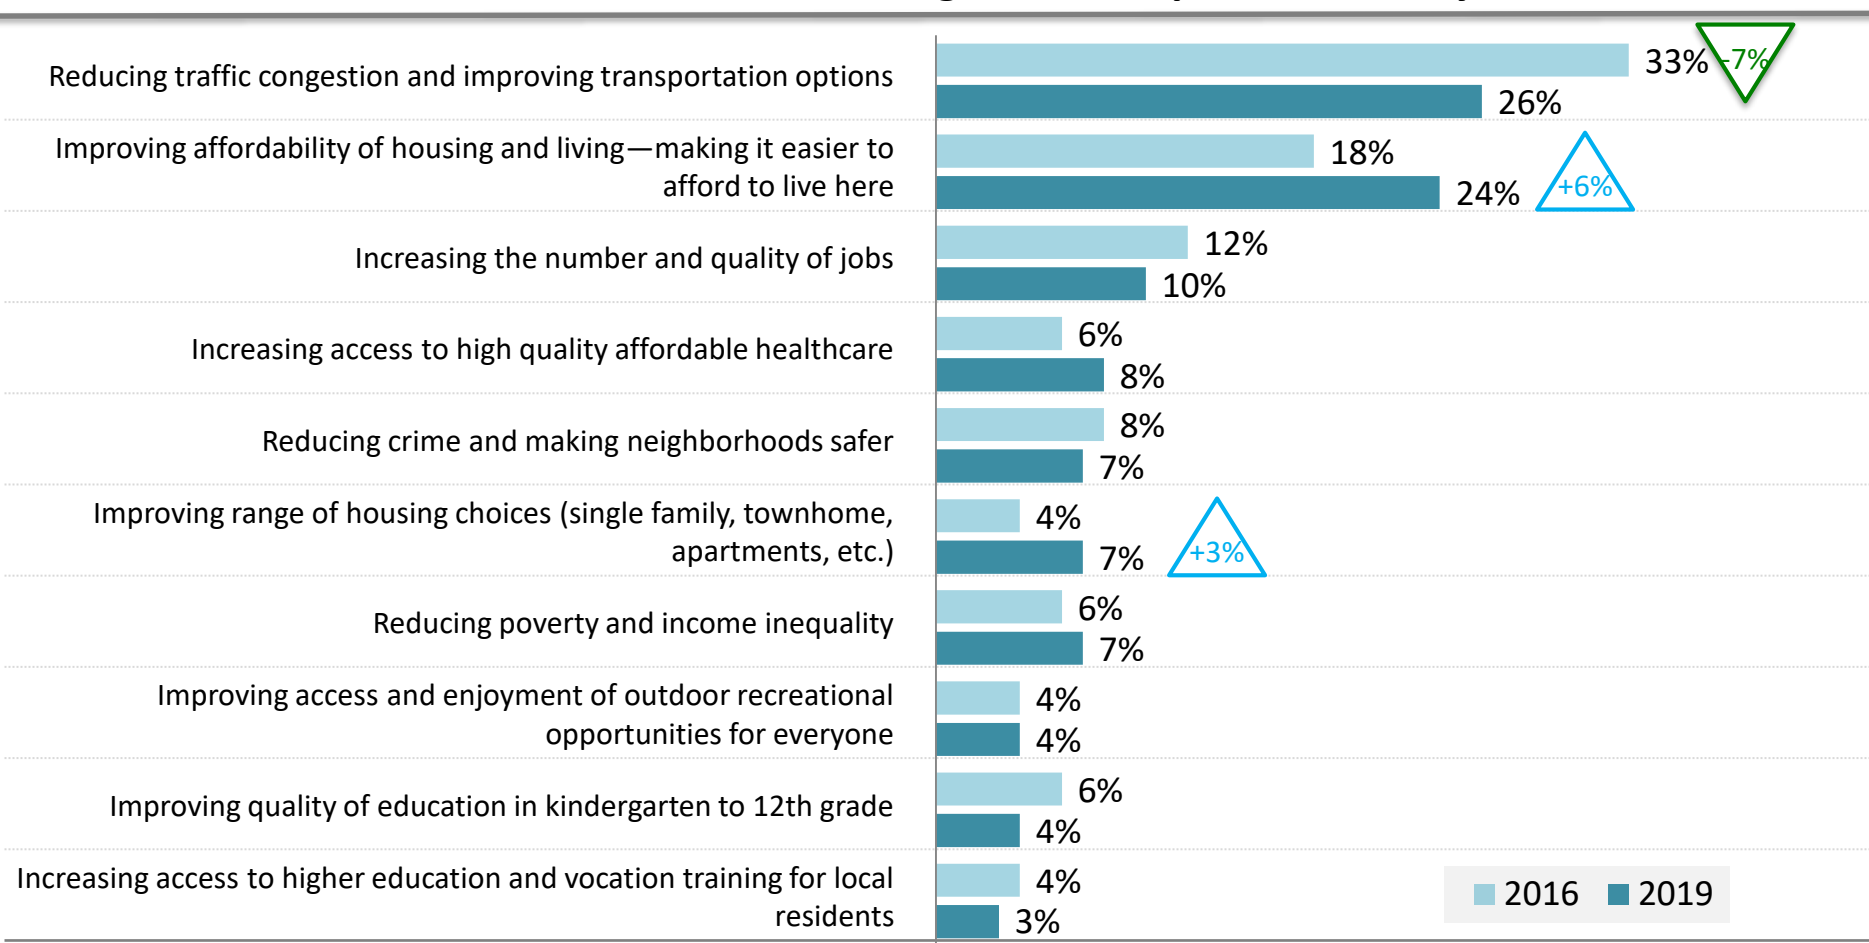

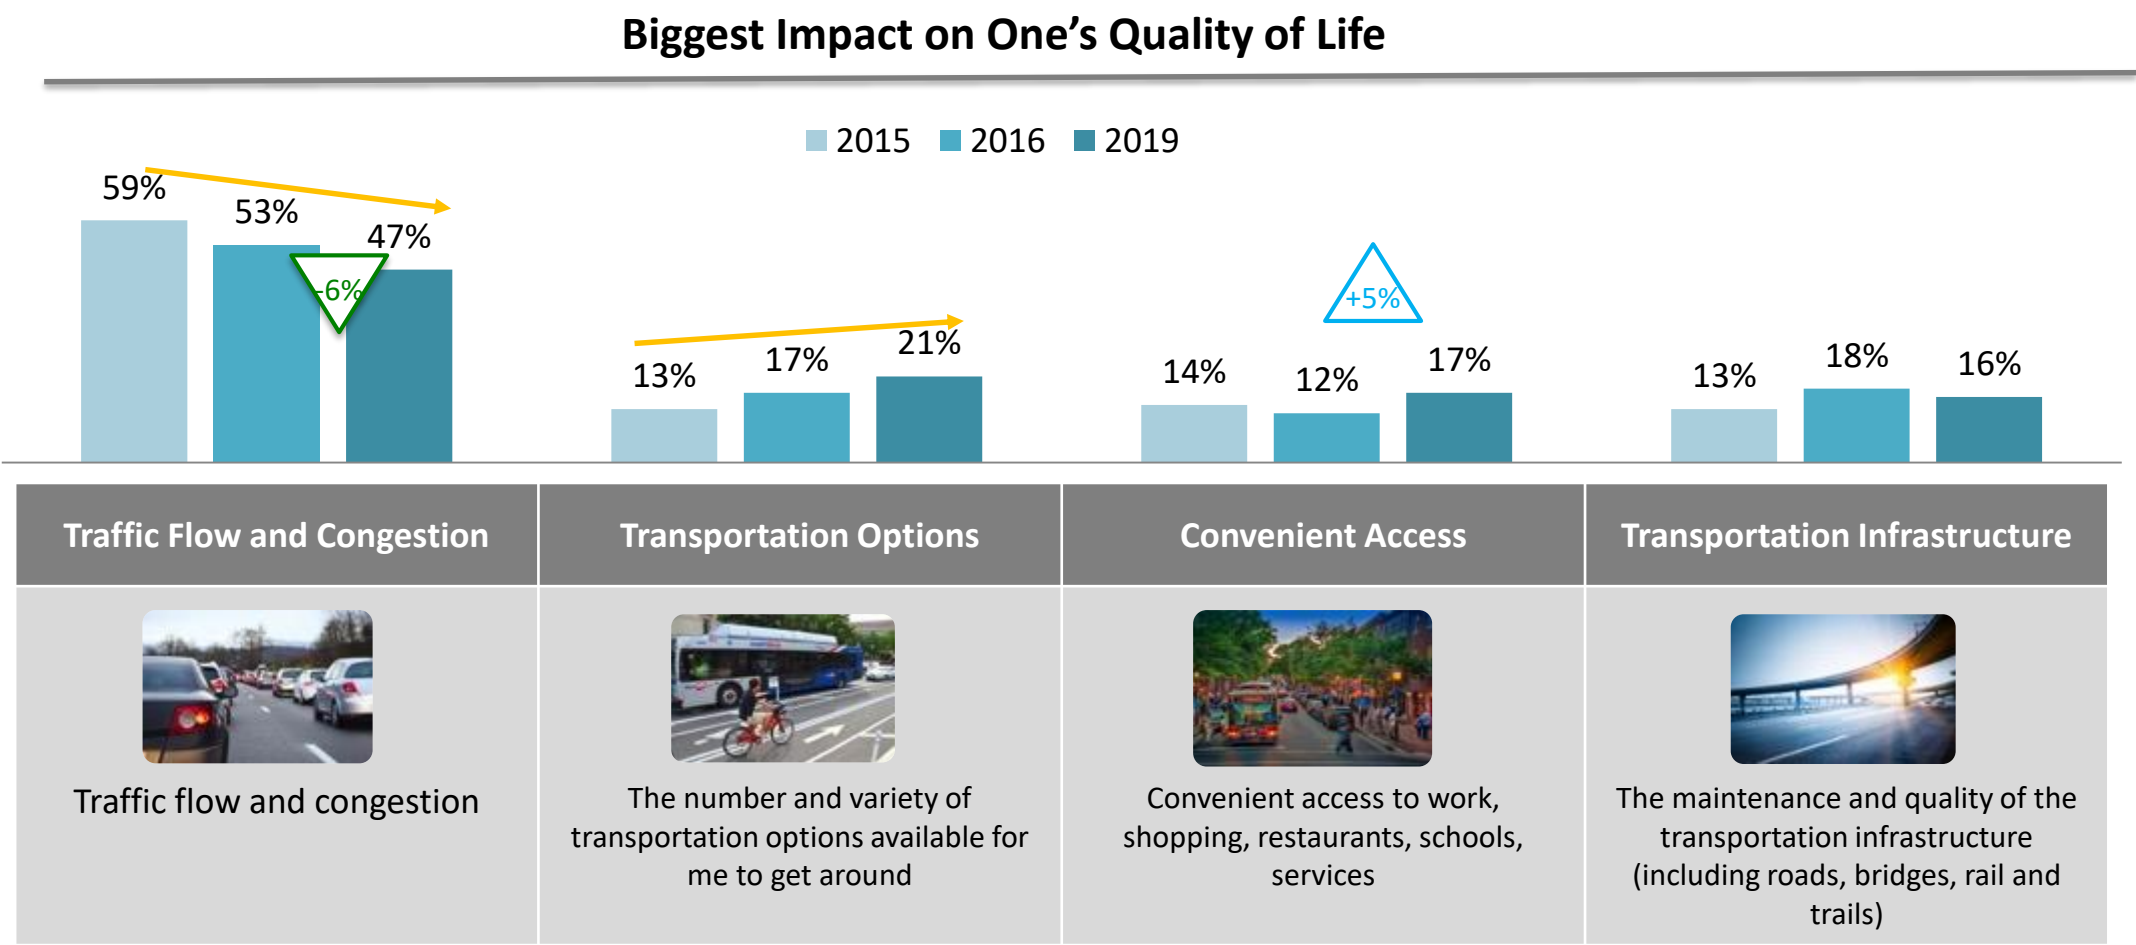

▽ Denotes statistically significant differences between 2016 and 2019 (p<.05)

NVTA's TransAction

Decline of traffic congestion on Quality of Life continues: Indicating the issue is being handled well.

Biggest Impact on One's Quality of Life

NVTA's
TransAction

Positive story recall is primarily about roads and metro/WMATA.

Top-of-Mind Transportation Issues

Positive

- **35% Road Mentions**
  - *Opening the new EZ Pass lanes on 395 inside the beltway.*
  - *Approved a road bond to address some of the issues with road problems in Prince William County.*
  - *They plan on expanding RT 28 and certain roads in Manassas.*
- **29% Metro/WMATA Mentions**
  - *The completion of the metro silver line in Ashburn, VA.*
  - *I've heard of new metro stations being opened in my area (Herndon/Dulles) and near Dulles airport.*
  - *There is a train that is going to go between Richmond and DC.*
- **12% I-66 Mentions**
  - *Express lanes on 66, expansion on 66, metro making improvements to correct deferred maintenance.*
  - *Major construction of additional lanes on 66. Addition of toll lanes on beltway and 66.*

- **10% HOV/Express Lanes Mentions**
  - *HOV lanes from beltway to DC line,. Most important to me is attention to the gridlock on I 95, particularly at Rt 123, and then down to Fredericksburg.*
- **10% Traffic/Congestion Mentions**
  - *Plans to improve traffic congestion around the Occoquan area on I-95.*
- **7% Bus Mentions**
  - *They are planning on widening Rte. 1 and adding dedicated bus lanes to ease congestion.*

NVTA's TransAction

Negative story recall is primarily about metro/WMATA, roads, and traffic congestion.

Top-of-Mind Transportation Issues

Negative

- **33% Metro/WMATA Mentions***
  - *There may… be a delay for opening of new metro stations. Similarly, several stations between Vienna and Falls Church will be closed next summer.*
  - *The extension of the silver line of the metrorail will be delayed due to contractor's shortfalls. It will cost substantially more money to correct these shortfalls.*
- **30% Road Mentions****
  - *Turning a lane of Seminary Road… into a bike lane, which I absolutely opposed since it clogs traffic more than it previously was. Adding toll lanes on 395.*
  - *Most of the news on transportation has been related to toll roads and traffic congestion in the Washington DC metro area.*
- **28% Traffic Congestion Mentions****
  - *Concerns regarding increase in traffic once Amazon HQ arrives in crystal city.*

- **21% Tolls****
  - *Lots of projects; not enough money; more toll roads; more limited access roads for those who can afford them.*
- **10% Bus Mentions****
  - *Bus strike/Bus drivers on strike.*
  - *One of the things I've read recently about transportation issues is that a big group of our bus drivers are officially boycotting*
- **8% I-66 Mentions***
  - *I have read that 66 is being widened. Also that inbound 66 has had tolls as high as $46 for a drive of a few miles*
  - *I-66 is under construction for the installation of toll express lanes, with commuter lots.*
  - *Route 66 will eventually be a toll road and all lanes would require an easy pass.*

- * Down significantly from 2016
- ** Up significantly from 2016

Transportation

APPENDIX: PRIOR WAVE DATA

In 2017, NVTA should continue to focus its efforts on reducing trip times and making transportation affordable, but by way of new transportation options and technologies.

2016: Importance vs. Performance*

Scatter plot with Importance (x-axis, 25% to 80%) and Performance (y-axis, 20% to 30%). Mean Performance: 25%. Mean Importance: 56%.

Data points:
- Express lanes, dynamic price
- Locating new growth near transit stations
- Supports local businesses
- New highways, road improvements
- System connecting rail, roads, bus, etc
- Convenient to walk
- Latest tech, efficient, safe
- Express/rapid bus service
- Increasing public trans routes
- Reducing trip times
- More predictable trip times
- Transportation system affordable
- New public trans options

*% rating each 8-10 on 10-pt scale
