

Dalia Leven
National Planning Lead for Transit and Shared Mobility,
Cambridge Systematics

@camsys

Dalia Leven is Cambridge Systematics' National Planning Lead for Transit and Shared Mobility and has 16 years of experience planning for the future of multimodal mobility. Her work focuses on transit planning and analysis, travel demand forecasting, and planning for emerging transportation technologies and their impacts on travel behavior and the built environment. She leads innovative multimodal planning projects across the country, including bus network redesigns, corridor studies, and the creation of cutting-edge tools and metrics designed to provide insight into the impacts of transportation choices while accounting for uncertainty about the future. She is currently helping NVTA manage the update of TransAction,

the long-range transportation plan for Northern Virginia.
