

Jeffrey King

Director of Climate, Energy and Air Programs for the Metropolitan Washington Council of Governments

@MWCOCG

Jeffrey King is the **Director of Climate, Energy and Air Programs at the Metropolitan Washington Council of Governments**. His team manages COG's Climate Energy and Environment Policy Committee (CEEPC), the Build Environment and Energy Advisory Committee (BEEAC), and the Metropolitan Washington Air Quality Committee (MWAQC). His project experience includes development of control strategies to reduce emissions of criteria pollutants and greenhouse gases for all sectors.

His team manages a variety of electric vehicle initiatives, including providing technical support to area local governments develop electric vehicle transition plans for government operations and community. He also has experience in solar market development, solar mapping, supporting cooperative solar procurement, energy system feasibility assessments, energy emergency planning and coordination, and diesel equipment engine retrofits. His team also leads efforts to support local climate and energy action plans.

He has more than 30 years of experience and a degree in Natural Resources from Cornell University and CPM from George Washington University.
