Context: Summary of Candidate Projects

NVTA FY2022-2027 SYP: Number of Applications

Total candidates - 26

NVTA FY2022-2027 SYP: Requested Amount

Total request - \$1,229,166,553

NVTA FY2022-2027 SYP: Total Project Cost

Total project cost - \$3,054,420,091

Key Components of the Project Selection Process

- While NVTA has no direct role in deciding which projects/modes are submitted by eligible applicants, projects submitted for funding consideration must be included in the current version of TransAction.
 - Each application must include a resolution of support from the Governing Body in order to be eligible for consideration.
- Eligible applicants determine which, if any, projects to submit to NVTA for funding consideration.
 - Each applicant has its own process for making this determination.
- The available funding amount for each Six Year Program Update is usually determined as part of the fiscal year budgeting process, which is after the application deadline.
- NVTA's project selection process adheres to all applicable parts of the Code of Virginia.
- NVTA staff project selection recommendations are not based on a single factor, although congestion reduction relative to cost provides the initial ranking.

Key Components of the Project Selection Process

- **Eligibility Review** (TransAction, Governing Body resolution, candidate project located in NoVA)
- **Quantitative Analysis** (Congestion Reduction Relative to Cost, TransAction Project Ratings, Long-Term Benefit)
- **Qualitative Analysis** (Continuation project, past performance, extent of committed external funding, funding gap, project readiness, supporting resolutions from other Governing Bodies, other factors specific to individual candidate projects, modal and geographic balance)
- **Public Comment** received during the public comment period (online, email, testimony, USPS/delivery, phone)

Key Components of the Project Selection Process

- The **Long-Term Benefit (LTB)** requirement of the Code of Virginia, enacted through House Bill 2313 (2013), means NVRTA must ensure that, over the long term, each member jurisdiction receives a benefit that is approximately equal to the share of regional revenues attributed to that locality.
- Application of the **LTB requirement**:
 - Depends on the number/applicants of projects, and associated funding requests, in the candidate pool.
 - Process seeks to find an appropriate balance between accuracy/precision without unduly expending resources that could otherwise be used for funding projects.
 - Does not reverse any previous funding approvals; intended to balance funding approvals until benefit is approximately equal across all nine member jurisdictions.
- The **LTB process** will continue to evolve over future SYP update cycles.

 - Continuation project (\$7,400,000)
 - Funding request is for ROW – not able to commit without a clear pathway to secure construction funding of \$185M

NVTA Staff Recommendations

- The Long-Term Benefit (LTB) requirement explicitly affects 2 recommendations:
 - Ballston-MU West Metrorail Station Entrance (Arlington County) recommended for full funding – CRRC rank #24/26*
 - Neabsco Road Improvements (Prince William County) not recommended – CRRC rank #20/26
- The extent to which any residual LTB imbalances remain, or new imbalances are created, will be assessed after adoption of the FY2022-2027 SYP.

*Note: In addition to Long-Term Benefit, other factors included in the recommendation of funding for this project include: overwhelming public support, strong TransAction project ranking (#8/26), and modal/geographic balance.
